

Drawing sophistication

Adding a little luxury and a whole lot of style made this kitchen a winner

While organising two of the most stressful things that you can do in life — building a new home and planning a wedding — this happy couple can be forgiven for overlooking the kitchen. With an almost complete and happy home, the owners needed an elegant revamp to fit in with the rest of the stunning home.

Choosing Kitcheners Kitchens took the worry out of having to design and build the kitchen as they developed this spectacular new upgrade. Staying with the existing layout, the kitchen was customised to the owners' specifications with polyurethane cabinetry and plenty of drawers.

The prestigious new look complements the residence and adds to the flow of the home. Attention to detail in the fixtures and finishes gives an opulent feel, while handleless drawers and doors enhance the refined modern ambience of the space and the lilac splashback adds a contemporary twist to the room. Previously, the kitchen was technically sound; style was the problem. The area is now the fashionable hub of the home. The appealing large island bench is a convivial space in which to eat, talk and, more importantly, create.

With great storage space and innovative design aspects, this kitchen is certainly a cut above its previous attire and proves that with state-of-the-art design and top-quality finishes, a kitchen can be magnificent without breaking the bank.

STYLISH DESIGN HAS BEEN COMBINED WITH INNOVATIVE IDEAS TO CREATE THIS WONDERFUL SPACE.
