

KITCHEN INSPIRATIONS

Designing a kitchen to suit your needs and preferences is never easy, so it's a good idea to get the experts' view. On the following pages we look at five different kitchens, designed by experienced professionals to fulfill the needs of the owners. They may provide just the inspiration you're looking for.

When Bronwyn and Richard Fry renovated their Marrickville terrace they were determined to give it the kitchen it deserved – and that expressed their personalities as well.

PHOTOGRAPHY KITCHENER'S KITCHENS

CLIENT'S BRIEF

Bronwyn says, “Wherever I’ve lived, both here and overseas I’ve found the kitchen is where guests like to congregate. And in our everyday life the family spends a lot of time in this space – so I wanted the ambience of the room to reflect my passion for cooking and entertaining and to be welcoming to our guests.”

INSPIRATION

Bronwyn knew from the start that she wanted her new kitchen to have a French-provincial feel. Because the area was quite narrow, Kitchener's decided a relaxed version of this style would work best without dominating the space.

CHALLENGES

Like many classic terrace-style homes, the kitchen of this home was long and

narrow, and the kitchen designer from Kitchener's Kitchens – who installed the new kitchen – ensured the new layout would maximise the space.

STAND-OUT FEATURES

Space-saving ideas such as placing the fridge behind cabinet doors, and including six large pantry drawers under the benchtop to store food neatly
