

SPEND THE SUMMER IN YOUR BRAND NEW CUSTOM MADE KITCHEN

STORY BY MICHAEL PENNY, PHOTOGRAPHY SUPPLIED BY KITCHENERS KITCHENS

Families spend significant time in the kitchen over the summer holidays. Whether it's having the family around for Christmas meals or entertaining the kids.

That's why it's a fantastic time to consider a new kitchen, and consider contacting Kitcheners Kitchens who specialises in designing kitchens that are more than just cooking spaces. Somewhere for family and friends to congregate, and something that is both stylish and functional.

A great summer kitchen for entertaining is often modern and minimal. Homeowners opt for few walls as an open inviting space allows for significant traffic flow when many guests are over. Also, an open planned kitchen, particularly one that adjoins the living room is popular with young families when parents want to keep an eye on the children.

In addition to the flow and spatial considerations, extra features can enhance the entertaining aspect of a kitchen. Some of these include island benches, differing benchtop heights, breakfast bars and loads of cupboards to store and conceal everything.

Now it's summer, think about a new designer kitchen from Kitcheners that makes entertaining a pleasure.

CaesarStone benchtop in Cashmere elegantly divides the kitchen and living spaces.
