

## Climate Friendly Business – Sustainability Statement

"Kitcheners Kitchens is taking action on climate change by working with Climate Friendly to measure and offset greenhouse gas emissions associated with its carbon footprint.

Kitcheners Kitchens has committed to mitigating climate change by offsetting 58.3 tonnes of greenhouse gas emissions with 39.45 MWh GreenPower to account for electricity consumption, and VCS renewable energy carbon credits sourced by Climate Friendly from the Gudhepanchgani wind farm, India, for all other measured emissions. These emissions include:

- 41.8** tonnes to offset electricity;
- 6.2** tonnes to offset transport;
- 4.9** tonnes to offset air travel;
- 0.1** tonnes to offset freight;
- 1.1** tonnes to offset paper; and
- 4.2** tonnes to offset waste

Kitcheners Kitchens will continue to work with Climate Friendly to benchmark their carbon footprint reductions through carbon accounting and regular benchmarking.

Kitcheners Kitchens is committed to making a difference by taking action on climate change now and working toward a clean energy future. To find out how you can take action visit [www.climatefriendly.com](http://www.climatefriendly.com)."
